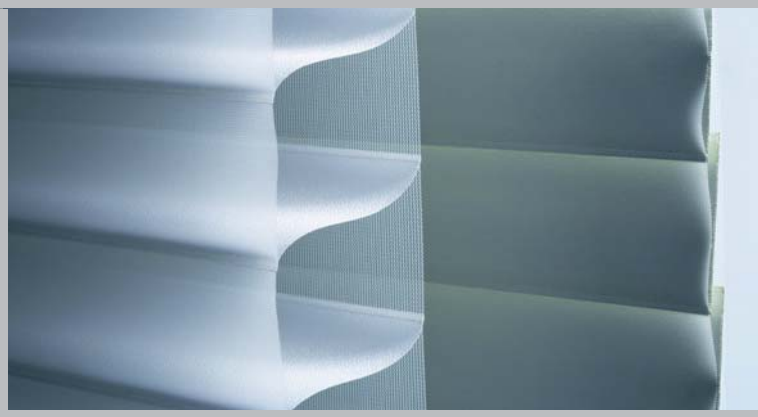
Reduce your **heating costs** up to.....

17%*[1] With 10mm Translucent	**28%*[2]** With 10mm Blockout	**26%*[3]** With 20mm Translucent	**32%*[4]** With 20mm Blockout

HONEYCOMB SHADES

SHEER SHADINGS



SECURE DAYTIME PRIVACY

The view from the street is obscured during the day while retaining your view to the outside

TRANSFORMS HARSH SUNLIGHT

Vanes and sheers combine to softly filter the light into the room

ENHANCES NATURAL DAYLIGHT

Sheers disperse sunlight deep in the room, reducing the need for electric lights

PROVIDES UV PROTECTION

Up to 88% ultraviolet protection with vanes open, 99% when closed, preserving furnishings and floors from fading and discolouration

Stylish Energy Efficiency

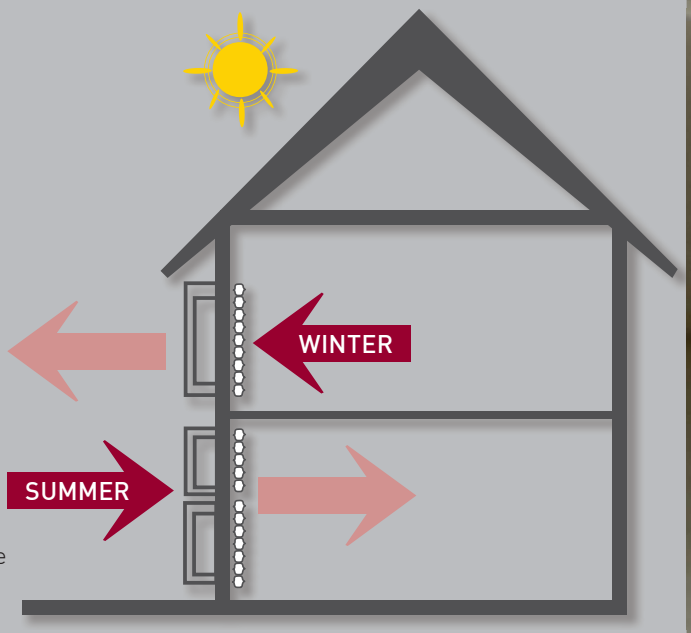
R-values and Honeycomb Shades

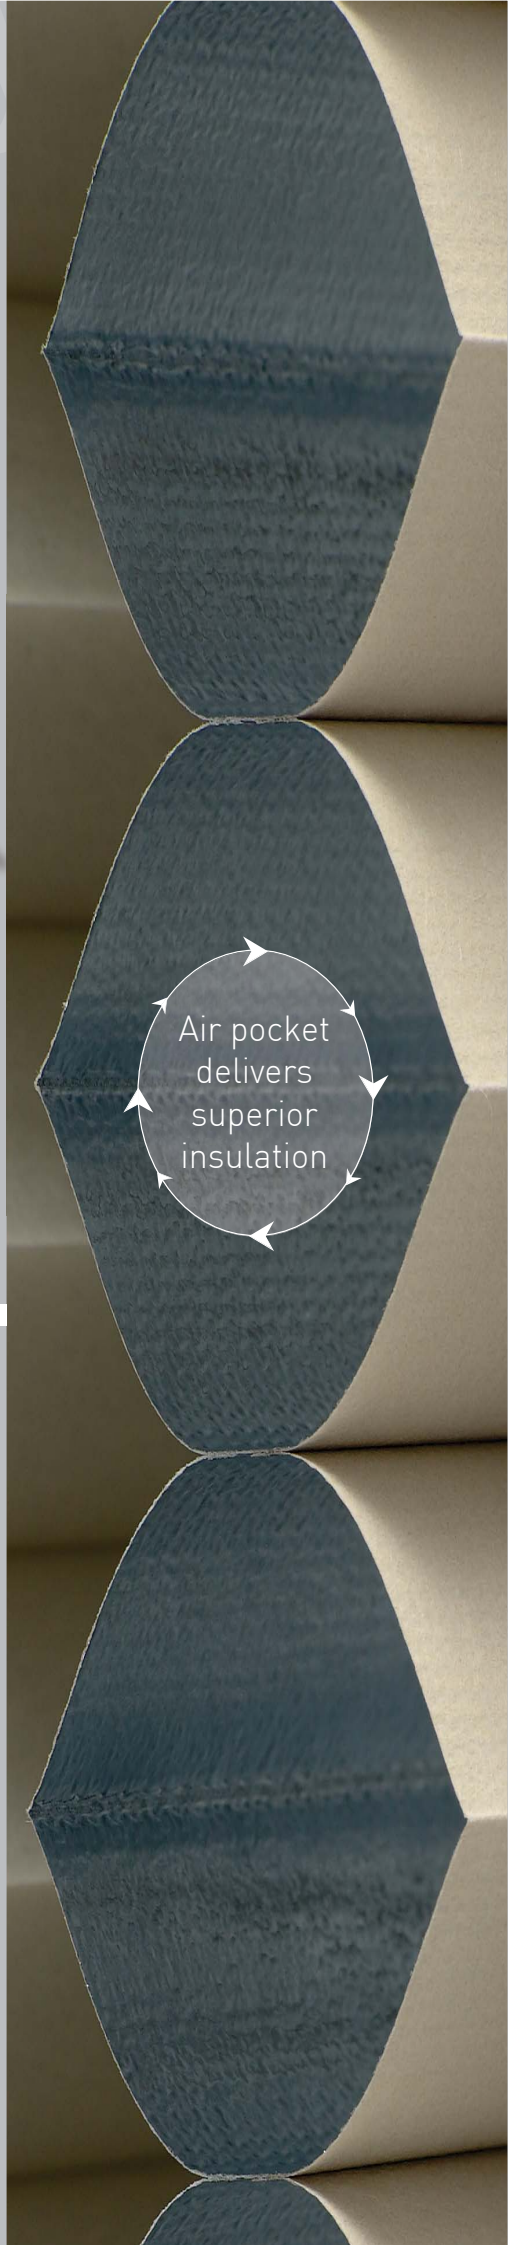
R-value** is a measure of a product's ability to resist heat transfer, which is especially important in the cool winter months, when a significant amount of a home's heat is lost through the windows. The higher the R-value, the more insulation a product provides and the better it is at reducing heat loss.

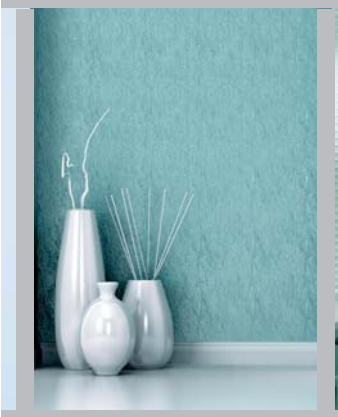
Honeycomb Shades are designed with a unique construction that creates an air pocket providing superior insulation at the window.

Did you know that windows can make up 10% of a home's insulated shell and that up to 30%# of total heat loss from a home occurs through uncovered windows?

Installing Honeycomb Shades helps slow heat transfer into and out of the home, reducing the energy needed to warm the home in winter and cool it in summer.







PRESERVES OUTSIDE VIEWS

No cords or tapes to obstruct outside views

REFLECTS SOLAR HEAT

Exterior white sheer reflects the sun's heat

Honeycomb Shades and Sheer Shadings combine style, versatility and functionality to provide you with innovative and modern window covering solutions to suit your home. Available in a range of operating systems, Honeycomb Shades and Sheer Shadings are the perfect solution for almost all window applications.

Honeycomb Shades Features and Benefits:

- The unique honeycomb construction allows air to be trapped within the cell, making Honeycomb Shades an energy efficient window covering solution.
- Made from anti-static polyester that aids in the resistance to dust making this durable fabric easy to clean and maintain.
- Light and privacy control is easily achieved with various design options including the Top Down/Bottom Up option.
- A sleek, streamlined and contemporary window covering solution, the construction keeps every cell crisp and consistent from front to back and top to bottom.
- Honeycomb Shades are covered by a 3 year warranty*.

Sheer Shadings Features and Benefits:

- Sheer Shadings feature soft, fabric vanes suspended between two sheer layers of fabric.
- Sheer Shadings feature beautiful fabrics and operating systems offering unparalleled elegance with functional design. Tilt, raise or lower the shadings for exceptional light control and alluring beauty.
- Sheer Shadings disperse sunlight deep into the room, reducing the need for electric lights and enchancing natural light.
- Sheers and vanes combine to provide up to 88% ultraviolet protection with vanes open, 99% when closed.
- Variable light control – vanes tilt to achieve just the right amount of light of natural illumination.
- Sheer Shadings are covered by 3 year warranty*.

* Conditions Apply. Refer to www.hunterdouglas.com.au for warranty details.

Fabric Selection

The Honeycomb Shades collection offers a wide range of choice when it comes to fabric ranges and colours. From the demur and subtle to the bold and dramatic, the fabric range has a style to suit anyone's home.

The Emerge range, the delicate Embrace range, and the textured Calibre range, all represent affordable quality with on trend colours and textures.

The light filtering qualities of Classic and Symphony, the ultimate in blocking out the outside world with Nightfall and MiJnight and the transparent, complete view through of the Sheer range.

Cell Size

Available in two distinct cell sizes of 10mm and 20mm, the Honeycomb Collection can make either a bold and contemporary statement or a refined but graceful statement.

The selection of fabrics in the 10mm cell size includes Embrace, Calibre, Classic and Nightfall. The selection of fabrics in the 20mm cell size includes Emerge, Embrace, Calibre, Symphony, Midnight and Sheer.

10mm Cell Size 20mm Cell Size

Cell Construction

The uniqueness of Honeycomb Shades is unparalleled, with the cell construction acting as an insulator trapping air within the cell. This construction reduces heat gain in summer, keeping your home cooler and in winter reduces heat loss keeping you warmer.

Opacity

Honeycomb Shades are available in three distinct opacities.

Blockout

Providing the ultimate in light and privacy control.

Translucent

Gently filtering light, whilst maintaining privacy.

Sheer

Allowing the outside view to be maintained whilst gently filtering the light.

Operating Systems & Design Options

Honeycomb Shades are available with a selection of easy-to-use operating systems that have been designed with innovation and child safety in mind. There is also a choice of speciality shapes and design options for more flexibility.

- Elimination of lift cords means enhanced safety for children and pets
- Intuitive operation by raising and lowering the contoured headrail
- Utilises pockets and ferrules in the headrail to easily adjust the shade during installation
- SimpleLift Lifting System is available with a range of fabrics
- maximum size availability is 2140 x 1980mm
- SimpleLift Lifting System is available with standard bottom-up operation only
- Available in 4 hardware colours

Care and Cleaning

Honeycomb shades are made of anti-static, dust-resistant fabric which repels dirt and dust. For most honeycomb fabrics, the following cleaning options are available

Dusting

- Regular light dusting with a feather duster is all the cleaning that is needed in most circumstances.

Vacuuming

- For deeper cleaning, vacuum gently with a brush attachment.

Compressed Air/Hair Dryer (Cool Setting)

- Use compressed air or a hair-dryer on a cool setting to blow dust and dirt off shades.

Spot-Cleaning

Caution: Do not spot clean fabric-covered valances.

- Prepare a solution of warm water and a mild detergent.
- Dampen a clean cloth in the solution and wring it out.
- Dab the spot with the dampened cloth until it is gone. Do not rub the fabric.
- Allow the shade to dry in the completely lowered position.

Bathtub Cleaning/Water Immersion

Caution: Do not immerse fabric-covered valance, Sunterra and all blockout fabrics in all fabric ranges.

- Immerse the shade in a basin or bathtub filled with warm water and a mild detergent. Never immerse the headrail into the solution.
- Rinse with clean water.
- Before removing from the rinse water, fully raise the shade and tilt it to allow excess water to drain off.
- Dry the shade completely in the lowered position.

Ultrasonic Cleaning

Caution: Do not ultrasonically clean fabric-covered valances. Do not ultrasonically clean blockout fabrics. Do not ultrasonically clean Sunterra.

- Some honeycomb fabrics can be ultrasonically cleaned by a professional.
- Specify that a mild detergent solution be used.
- Never immerse the headrail into the solution.
- Dry the shade completely in the lowered position.

Injection/Extraction Cleaning (onsite Blind Cleaning)

Note: Only available in limited regions.

- This type of professional cleaning injects a cleaning solution into the fabric and extracts the dirty solution in the same motion.
- Use only the dry method of injection/extraction for blockout fabrics.

SHEER SHADINGS OVERVIEW

Sheer Shadings feature soft, fabric vanes suspended between two sheer layers of fabric.

Our Sheer Shadings are designed to put you in control of the amount of natural light that comes in, with beautiful effects.

Transform harsh exterior light by diffusing it and spreading it evenly throughout the room. This helps maximise daylight hours and reduce the need for artificial light.

Our beautiful Sheer fabrics also softly filter out brightness, glare and UV rays – protecting furniture and flooring from fading.

Sheer Shadings offer captivating colours and textures to transform any room. Featuring modern and traditional colour pallets, ranging from bold and neutral tones.

Ombrage Translucent/ **Nuage** Room Darkening

Traditional understated fabrics bring warmth to your home. Available in 28 matching translucent and room darkening fabrics.

Deck Chair

Cordless Child Safe Operating Systems

EasyRise

Continuous cord loop system with secured cord tensioner for easy operation no matter the size of the shading.

Hard-Wired

Features a hard wired motor in the blind headrail that uses house power to raise and lower the shade from commands from a remote or wall switch.

This is the premium control choice, and can be wired into home automation systems.

LiteRise Cordless Operation

Completely cordless operating system offers light control along with added child and pet safety benefits. The LiteRise handle allow the shade to be raised and lowered, also offers the functionality of tilting the vanes by hand.

Control the amount of light entering each room of your home

Translucent Fabric Vanes

Translucent fabrics gently filter light to provide a warm glow while preserving the outside view and protecting furnishings from UV fading.

Room Darkening Fabric Vanes

Room darkening fabrics help to darken the room whilst providing complete privacy without total darkness.

Choose from two vane size options. Each vane size offers its own aesthetic appeal from understated and classic to bold and dramatic.

50mm vane size

65mm vane size

Cleaning Procedures

Sheer Shadings are made of 100% polyester, which means they are inherently durable and resilient. However, care must be taken to avoid wrinkling the fabric, particularly where the vanes meet the facings.

Dusting

Regular light dusting with a feather duster is all the cleaning that is needed in most circumstances.

Vacuuming

Use a low suction, hand-held vacuum for more thorough dust removal.

Forced Air

Blow away dirt and debris between the vanes using clean compressed air.

Note: Do not spot-clean anything on sheer shadings.

Ultrasonic Cleaning

Sheer Shadings can be ultrasonically cleaned by a professional, with the exception of Mystique.

- Specify that a mild detergent solution be used.
- Never immerse the headrail in the solution.
- Dry the shading completely in the lowered position.

Injection/Extraction (Onsite blind cleaning)

Sheer Shadings can be professionally cleaned using the injection/extraction method.

- Use only the dry method of injection/extraction for Mystique
- Never immerse the headrail in the solution.

Note: only available in limited regions.

Electrostatic Cleaning

Do not use electrostatic cleaning wipes on any Sheer Shadings.

A Note About Sheer Shading Fabrics

As with all textiles, Sheer Shading fabrics are subject to some variations. Slight wrinkling, puckering, or bowing is inherent to this textile product and should be considered normal, acceptable quality. These characteristics are not usually visible from the front or rear but may be visible from a side angle.

Precautions should be taken to reduce exposure to harsh environmental elements, such as salt air. Continuous exposure through open windows and doors will accelerate the fabric deterioration.

Based on information from NABERS (National Australian Built Environment Rating System). Visit www.nabers.com.au for more information.

* Savings are based on the installation of fully-recessed, reveal-mounted in either:
1 Hunter Douglas 10mm single cell translucent fabric
2 Hunter Douglas 10mm single cell blockout fabric
3 Hunter Douglas 20mm single cell translucent fabric
4 Hunter Douglas 20mm single cell blockout fabric
in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation.

** The R-values are the combined measurement of 3mm (one-eighth inch) CI glass (R=0.127) plus the window covering and are reported in metric SI units. Thermal properties are determined by a certified third party laboratory utilising accepted ASTM, NFRC and WES standards and procedures. Measurements may vary based on window type and method of installation.
